Case Study - December 2022

Shoppable Display drives NTB sales on search terms not reached by Sponsored Product

Situation

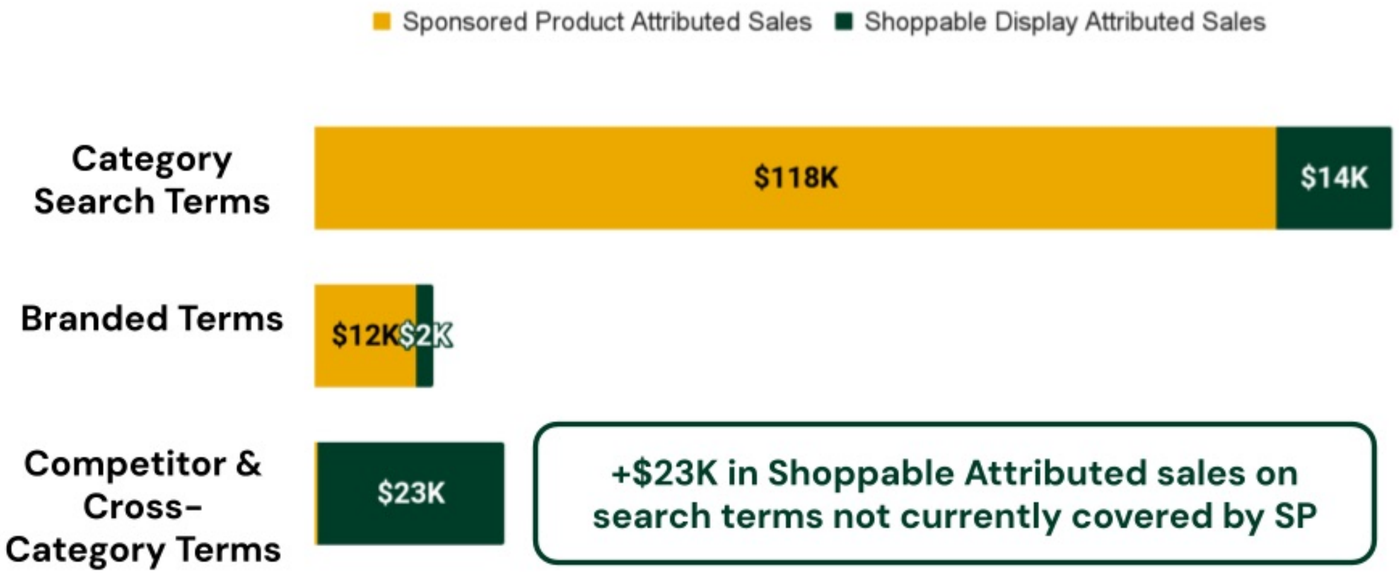
Advertiser X tested Shoppable Display as a complement to an existing always-on Sponsored Product strategy.

Shoppable targeting focused on providing additional coverage on competitive category terms & reaching into new cross-category terms that are difficult to reach with Sponsored Product alone.

This case study includes custom reporting that may not be included in standard reporting for these products. Custom analyses available pending investment rate.

Attributed Sales by Tactic

on search terms included in Shoppable Display campaign



+$23K in Shoppable Attributed sales on search terms not currently covered by SP

50% New to Brand
from Shoppable Display on search

2.2X ROAS
from Shoppable Display on search

Impact

Advertiser X saw over $23K in Shoppable attributed sales on search terms they were unable to reach with Sponsored Product, with an exceptionally strong % NTB and ROAS compared to typical performance across their ad tactics.
